Diacritical Codes

In the following list, "Code" is the percent-sign code that must be used in dBase, "Char." is the character that will be printed in the BFV volume, and "Alt. Code" is the code that can be used in WordStar to edit this character into a file. To use the Alt. code, hold down the Alt key while typing in the number on the numeric keypad. When you release the Alt key, a symbol will appear at that point in the text; this symbol usually looks nothing like the character that will be printed.
